

Entrance Requirements

Bachelor (undergraduate) degree in Landscape Architecture or a related discipline completed with a minimum of 180 ECTS (three year course) or an international equivalent. Applicants with a 240 ECTS or an international equivalent (four year course) undergraduate degree can begin the course immediately the following winter semester (subject to successful entry). Applicants with an ECTS less than 240 (or less than a four year bachelor degree course) will be required to supplement their ECTS by studying modules taken from the undergraduate degree course "Landschaftsarchitektur" at Neubrandenburg University of Applied Sciences before proceeding to the postgraduate course.

Proficiency in the English language at (GER) B2 or an international equivalent is required.

Application Process and Deadline

Please follow the relevant application steps that can be found online at

Path A: 30th June for students with international qualifications, 31st July for Students with german qualifications.
Path B: 30th June for students with international qualifications, 31st January for students with german qualifications.

Timeline

The course of Path A starts on the 1st of September with the winter semester. The course of Path B starts on the 1st of March with the summer semester.

The examinations are spread over several weeks directly following the lecture period. Upon successful completion of the modules, students proceed to their master-thesis. This is supplemented by the colloquium after completion of the thesis.

HOCHSCHULE
NEUBRANDENBURG
University of Applied Sciences

Postgraduate Degree

**LANDSCAPE STUDIES AND
GREENSPACE MANAGEMENT**

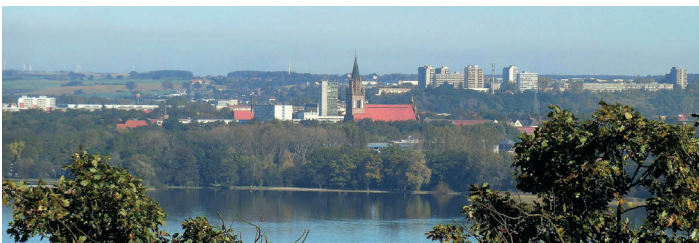

UNIVERSITY AND REGION

The Neubrandenburg University of Applied Sciences campus is located between the town centre of Neubrandenburg and Lake Tollense in the State of Mecklenburg-Vorpommern. The region is a popular holiday area set within an attractive landscape between Germany's capital city Berlin and the beautiful sandy shores of the Baltic Sea. This landscape is dotted with historic manor houses and their landscaped gardens, lakes and rolling hills formed at the end of the last major ice age.

With just over 2000 students our campus offers an intimate atmosphere to study and learn with an excellent professor/ student ratio. As the name "University of Applied Sciences" suggests, our courses are orientated to dealing with practical problems and finding practical solutions.

We have excellent facilities which include modern laboratories, workshops, libraries, CAD- and seminar rooms, lecture halls, a refractory, a coffee-shop, study areas and on campus student accommodation. We work in close cooperation with local businesses and institutions, but are also linked to companies and partners all over the world. The teaching staff integrate their current projects and research into the curriculum to keep the courses fresh and up to date.

Our university welcomes applications from international and German students alike as well as from our partners.

For more information

COURSE DESCRIPTION

We are offering two paths to obtain a master's degree in Landscape Studies and Greenspace Management. Both paths contain elements of landscape studies and greenspace management and also include the opportunity to improve language skills, experience other ways of working and gain insight into specialized fields on the edge of landscape studies and greenspace management, meet other cultures and the chance to explore Mecklenburg's unique landscapes. The course is taught in English and the teaching programme is open for both German and international students.

Path A is for students with bachelor degrees in Landscape Architecture and lasts two semesters. The first semester consists of three compulsory and two compulsory-elective modules which prepare the way for the final semester and an intensive four month master-thesis.

Path B is for students with bachelor degrees in subjects related to landscape architecture, such as Architecture, Landscape Planning, Landscape Ecology and Geography. Path B lasts four semesters. The first semester consists of three compulsory and two compulsory-elective modules. For the second semester path B students join path A and share the three compulsory modules during the winter semester. The 3rd semester is an internship and leads to the four month master-thesis in the final winter semester.

CURRICULUM

1st semester Path B
Dendrology and Planting Design
Landscaping and Materials
German / Foreign Language
Elective Module 1
Elective Module 2

2nd semester Path B | 1st semester Path A
Greenspace Management
Design Studio 1
Landscape and Structures
Elective Module 3
Elective Module 4

3rd semester Path B
Internship

4th semester Path B | 2nd semester Path A
Masterthesis inc. Defence Colloquium
Elective Modules
Design Studio 2
Designing in the Historical Environment Maintenance of Green and Open Spaces Documentation, Modeling, Surveying Ecological Engineering and Green Infrastructure Landscape Architecture in International Context Visualization and Data Modeling Management in Business and Authorities Spatial Data Infrastructure GI Technologies
Module from another Department at NB UoAS
